# ZAMAGNAITALIA

BE HOME BE ALTERNATIVE

*Your home, your life, your style.*

**We are an Italian family and we have been doing business since 1960: added values to our international enterprise.**

We like to talk about freedom in furnishing, with a desire to be different in the way we design the furniture and accessories that complement your everyday life and turn your home into something truly unique. We are involved in each stage, from the initial idea to the realisation of the final product, as professionals and as human beings.

We work on projects that can have a positive impact on people's lives. We select the highest quality materials, and the workmanship is the fruit of experience, expertise and a continuous quest for improvement.

**Temptation** is a Collection that was created from the meeting between Luca Zamagna's entrepreneurship as owner of Zamagna Italia, and Giacinto Muto, founder of MHC, who handled the Design and Art Direction.

Zamagna Italia's desire is to reposition the company brand on the Italian and international market with new proposals, to provide an alternative to those currently on the market.

What we present here is an initial Collection, comprising **Tables, Chairs, Sideboards, Mirrors and Coffee Tables**, which will soon see further developments, thanks also to the implementation of digital tools to make the task of choosing much simpler.

**Temptation**, as the word itself implies, wants to tempt customers into enjoying a designer collection with an international flair, in countless variants of finishes and materials, suggesting dozens of moods aimed at encouraging the customer to identify with the mood itself.

In fact, today interior design is not just a question of choosing items of furniture, but it also means immersing oneself into domestic scenarios that match one's personality.

**Temptation** pursues the values of beauty, culture, and freedom of expression, moulding itself to different personalities.

**Temptation** is the luxury of experiencing one's emotions inside the home; it is the world view that each of us can express through objects and furnishings.

The world over, succumbing to temptation has never been easier within the home, whether you live in a villa, loft or a studio apartment.
